

83WPIB53NKD

ABUS P/LOCK 83WPIB/53 KD SUBMARINER SERIES "Z" VERSION

Description

The ABUS 83WPIB Series padlocks are weather protected, chrome plated brass bodied padlocks with a plastic cover. It differs from similar styled weather protected padlocks in that the body is solid brass, not laminated steel. The plastic cover is manufactured using a dual injection process that results in a rubber-like material around the shackle opening, while retaining heavy duty durability around the rest of the padlock. This assists in preventing the cover from splitting. Dimensions a Body width 57 mm b Horizontal Shackle Clearance 24 mm c Vertical Shackle Clearance 28 mm d Shackle diameter 8 mm
